

Ostomy Patient Assessment Checklist

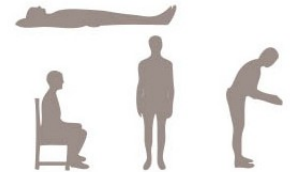

Step 1: [Click Here](#) to access a product suggestion guide for help:

1. Type of Ostomy: Colostomy | Urostomy | Ileostomy
2. Identifying ostomy profile – Budding | Flush to skin | Below skin
3. Determining best product fit

[Click Here](#): To learn about CeraPlus™ Skin Barrier for skin health integrity from day one

Tip:

When choosing a flat or convex barrier, patients should be assessed in a variety of positions with the pouching system off. Abdomen should always be assessed while patient is sitting.

Step 2: Click below to access basic ostomy care tip information:

[Click Here](#): How to cut and apply a one- or two-piece pouch

[Click Here](#): Routine care of your stoma

[Click Here](#): Peristomal skin care

[Click Here](#): How to measure your stoma video

Step 3: Click below to access tips for leakage or skin breakdown complications

[Click Here](#): How to use an ostomy ring

[Click Here](#): How soft convexity may improve fit

[Click Here](#): Using stoma powder to help address skin breakdown

Ostomy Patient Assessment Checklist
