Making a Difference in the Journey of Life

Ostomy Care Product Catalog

Hollister

Welcome to your Hollister Ostomy Product Guide

Within this guide you will find a range of products designed to suit individual needs, including CeraPlus™ Ostomy Products*, an advanced line of ostomy products that help keep skin healthy.

DERMATOLOGICALLY
SKIN HEALTH ALLIANCE®
ACCREDITED

CeraPlus™ Ostomy Products have received official dermatological accreditation from the Skin Health Alliance, bringing confidence and reassurance to end users.

Remois

*Remois is a technology of Alcare Co., Ltd.

Healthy Skin. Positive Outcomes.

Promoting Healthy Peristomal Skin

Promoting healthy peristomal skin

It drives everything we do. In order to promote healthy skin, it is important to understand that the fit of the pouching system as well as the formulation of the skin barrier go hand in hand.

A pouching system will not maintain a good seal without the proper fit. Without the correct formulation, the skin around the stoma can be at risk for complications.

Our goal is to help keep the skin around your patient's stoma as healthy as the skin on the rest of their body.

Hollister Secure Start℠ Services
Personalized Support

Why Secure Start℠ Services for Your Patients?

Secure Start℠ services helps patients—regardless of product brand they use—to get back to living life with confidence and security. We understand this is a process that takes time. That's why our no-cost, personalized service is available for the lifetime of their ostomy.

THE RIGHT PRODUCTS—based on your product recommendations, we help patients find the ostomy products that best fit their needs throughout the lifetime of their ostomy.

OSTOMY SMART EDUCATION—easy access to important care information and lifestyle resources that support the goal of maintaining healthy peristomal skin from the start.

SUPPLIER MATCHING—connects patients with a supplier of their choice based on their insurance plan for the products you recommend.

WOC ACCESS—if the need arises, an ostomy nurse is available to assist with product questions.

Support Throughout the Continuum of Care

We are proud to offer dedicated support for each and every patient we serve along the continuum of care. Hollister Secure Start services provide a lifetime of personalized support for our members.

Our team is focused on helping patients with:
- Finding the right product fit
- Navigating insurance coverage
- Identifying supplier options
- Providing condition specific education
- And more!

To learn more, call us at **1.888.808.7456**.

ENROLLMENT MADE EASY

Obtaining written patient consent to enroll in Secure Start℠ services is an important step. At Hollister, we prioritize patient privacy—giving patients comfort that their information will remain confidential and will be shared only with those they wish to hear from. Having patient consent on file helps us provide proactive ostomy education and product information throughout their journey.

CeraPlus™ Ostomy Products

Protection where it matters most

Start with CeraPlus™ Skin Barriers*

Protecting peristomal skin begins with a skin barrier that provides a secure, comfortable fit and a skin-friendly formulation. We focus on security and skin health when designing our skin barriers – including the ceramide-infused CeraPlus™ Portfolio.

The CeraPlus™ Line of Ostomy Products provide skin with advanced protection, and a full range of ceramide-infused options so you can create the personalized solution that's best for your patient's body.

Hollister.

Ostomy Care
Healthy skin. Positive outcomes.

FIT is critical to get a good seal around the stoma to prevent leakage

Barrier Examples

Flat Skin Barrier

Integrated Soft Convex Barrier

Integrated Convex Barrier

Integrated Convex Barrier with Round or Oval Convex Barrier Ring

Round barrier ring shown in picture.

Possible Clinical Case Scenarios

Flat Skin Barrier
- Flat peristomal plane
- Adequate stoma protrusion
- Centered stoma opening

Soft Convexity
- Creases or folds in peristomal plane
- Gentle pressure required to peristomal plane
- Flush stoma
- Peristomal injury

Firm Convexity
- Creases or folds in peristomal plane
- Off-centered stoma opening
- Stoma retracted below skin surface

Firm Convexity with More Depth
- Recessed or flushed stoma
- Uneven abdominal contours
- Off-centered stoma opening

Prior to use, be sure to read the Instructions for Use for information regarding intended use, contraindications, warnings, precautions and instructions.

FORMULATION is the customized ingredients responsible for adhesion, erosion resistance and absorption that must be carefully formulated to create an environment where healthy skin can thrive.

Types of Skin Barrier Formulations and Their Performance
The Hollister Ostomy portfolio has a multitude of formulation options that are designed to help ensure an optimal skin interface is possible for every patient.

Extended Wear

CeraPlus™ Skin Barrier
- Contains all skin barrier characteristics (adhesion, absorption and erosion resistance) and is infused with ceramide – a naturally occurring lipid in the skin which protects against dryness
- Its formulation is designed to help protect the skin's natural moisture barrier and help maintain good peristomal skin health

Flextend™ Skin Barrier
- Durable with high resistance to erosion
- Swells when it comes in contact with liquid to help form a seal between the skin and the stoma
- High initial tack and suitable for those who perspire heavily
- Strong adhesion and flexibility

Standard Wear

FlexWear™ Skin Barrier
- Good balance of durability and gentleness providing moderate adhesion, and can handle frequent or infrequent pouch changes
- Resistant to fluid erosion and tends to hold its shape in the presence of fluids
- Suitable for all skin types, depending on change frequency
- Designed to be worn more than one day

SoftFlex™ Skin Barrier
- Appropriate choice for:
  - Those who have thin, fragile, or sensitive skin (such as those who have undergone chemo/radiation therapy)
  - People who desire frequent removal
- Designed to limit skin damage as it's gentle to the skin, which allows for frequent pouch changes
- Thin and flexible without compromising security

CeraPlus™ Skin Barriers are demonstrated by evidence to reduce the occurrence and impact of PSCs[1]

As many as 75% of ostomates have peristomal skin complications (PSCs).[1] CeraPlus™ skin barriers protect skin from Day 1 making it an ideal first-line choice for your ostomy patients. When compared to non CeraPlus™ skin barriers, significantly more (75%) patients were "very satisfied" with the overall performance of CeraPlus™ skin barriers.[1]

- Helps support and maintain healthy peristomal skin[1]
- Delivers positive outcomes for ostomy-related costs and care[1]
- Provide fit with convexity options and adhesion performance to enhance skin health

Security + Skin Health = Protection Where it Matters Most

Protecting peristomal skin means using products that provide a good seal around the stoma and promote skin health. Hollister uses the unique combination of security and skin health to design skin barriers that help maintain healthy skin – including the ceramide-infused CeraPlus™ Portfolio.*
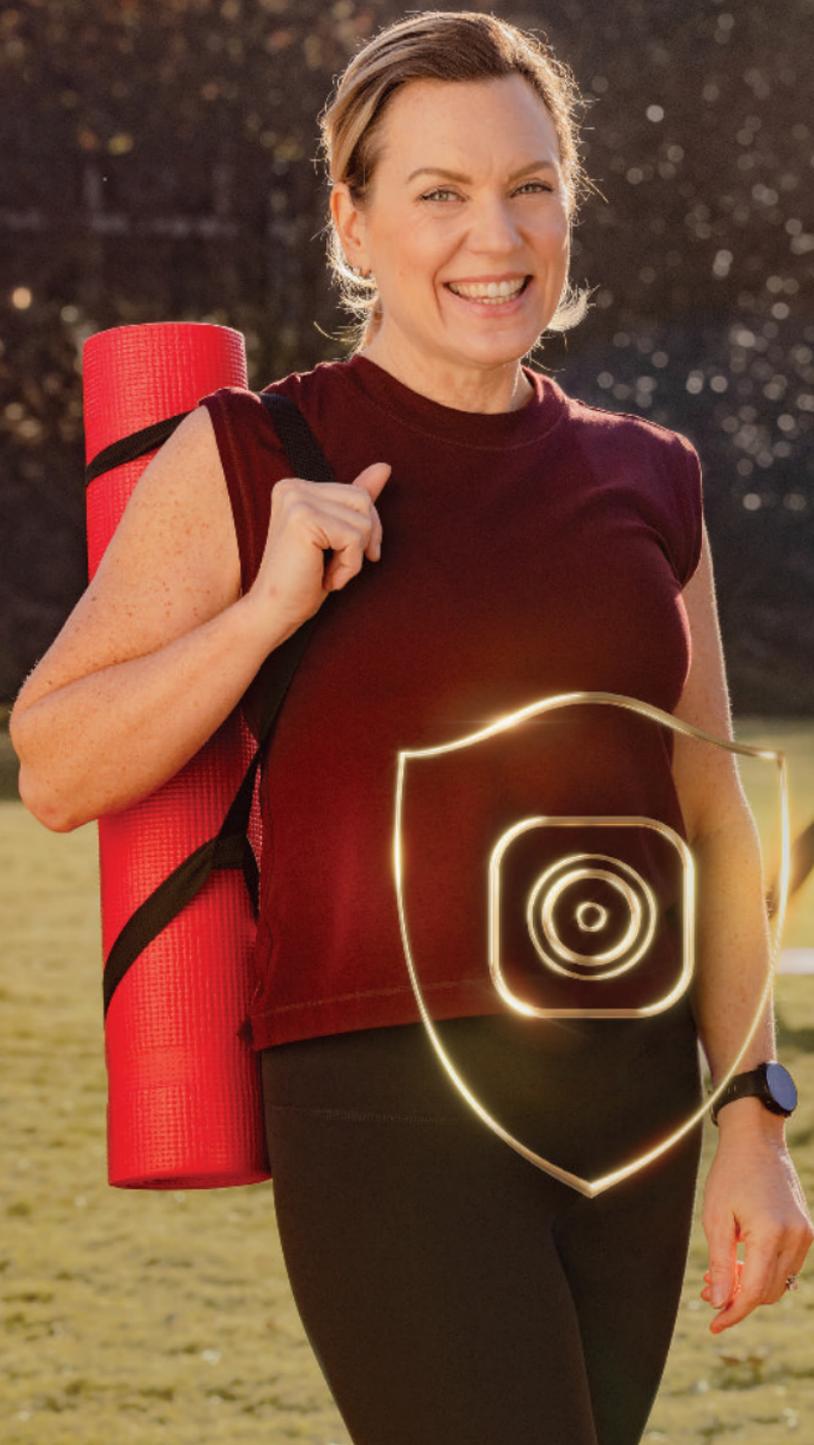

CeraPlus™ Products
Infused with Ceramide

Transforming the skin health conversation

At Hollister Ostomy Care, we believe peristomal skin deserves better. In fact, we think we should expect the skin around the stoma to be as healthy as the skin on the other side of the abdomen.

That's why we've made the pursuit of healthy skin our priority.

The CeraPlus™ Skin Barriers are formulated to support healthy skin from Day One. The ceramide-infused barriers are designed to help protect the skin's natural moisture barrier. Healthy skin can remain healthy through pouching changes, and support an appropriate fit around the stoma.

CeraPlus™ Skin Barriers - Available in One-Piece and Two-Piece Pouching Systems

At Hollister, we realize the importance of healthy peristomal skin. Our CeraPlus™ skin barrier is infused with ceramide, the skin's naturally occurring protection against dryness. CeraPlus™ skin barrier is designed to help protect the skin's own moisture barrier, and is available in one-piece and two-piece pouching systems. This means you can enjoy the same pouch and skin barrier features from Hollister that you've come to rely on—and more!

The CeraPlus™ Portfolio is the only advanced line of ostomy products in the U.S. infused with ceramide that protects skin from Day One.*

Remois

**CeraPlus Products contain the Remois technology of Alcare Co., LTD
Hollister Data on File. Ref-02739; 2021.*

 Hollister®

Ostomy Care
Healthy Skin. Positive Outcomes.

CeraPlus™ Skin Barrier delivers both Security and Skin Health

CeraPlus™ Skin Barrier

- Protects the skin's natural moisture barrier
- Decreases TEWL (transepidermal water loss) from damaged or eroded skin
- Maintains peristomal skin health

Color Matching System

Two-Piece Pouching Systems

To help you select compatible two-piece pouching system components, every box label is color-coded.

1. Select the skin barrier flange size with the appropriate barrier stoma opening and note its color code.

2. Select a suitable pouch with the desired features in the matching color.

Flange Sizes:

1-3/4" (44 mm)

2-1/4" (57 mm)

2-3/4" (70 mm)

4" (102 mm)

Look for the convex and soft convex symbols:

Two-Piece Ostomy Pouches

Available Features:

- Waterproof, integrated AF300™ filter is designed to allow gas and air to escape, but keeps odor and output in the pouch. Liquid cannot penetrate the filter, therefore not requiring a protective sticker

- Choice of secure pouch closure options – Lock 'n Roll™ microseal closure or clamp

- Numerous pouch size options to meet individual preferences

- Belt tabs for extra sense of security

Meeting individual needs
CeraPlus™ Soft Convex Skin Barrier is available in a range of sizes in one- and two-piece to suit individual needs

Comfortable and secure fit
Designed to conform to individual and changing body shapes for comfort and protection against leakage
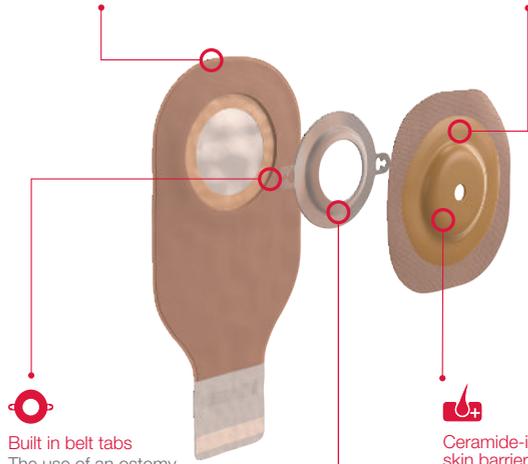

Built in belt tabs
The use of an ostomy belt can enhance the effect of the convexity by providing more barrier depth[1]

Ceramide-infused skin barrier
Ceramides serve as the skin's natural protection against water loss

Integrated soft convex insert
Provides a secure and comfortable fit to support the peristomal skin while applying gentle pressure to help the stoma protrude and flatten creases and folds

Available in both one- and two-piece options.

? DID YOU KNOW…

The *CeraPlus™* Skin Barrier is infused with ceramide

- Ceramide is a natural component of the human skin
- Ceramide links the cells of the stratum corneum together to form a waterproof, protective barrier
- Ceramide helps prevent water loss that can lead to skin damage and dryness

"Convexity should be considered in the immediate post operative period to ensure a consistent predictable seal and reduce the risk of leakage."

Convexity Consensus Statement 3

Follow the evidence to help ensure healthy skin

After surgery: Peristomal skin starts healthy

⊕

Top layers of the epidermis are removed with *every barrier change*.
It's unavoidable, and the damage isn't always visible.

⊕

Epidermal stripping is linked to increased levels of transepidermal water loss (TEWL)[1,2]

Healthy Skin:
Keeps moisture in and irritants out

Irritants and bacteria

Dry or cold air

Water retained

Low TEWL value = higher skin integrity[3]

Ceramides are abundant in healthy skin. They form a waterproof barrier to help keep moisture in and bacteria out.

▬ = Ceramides

Damaged Skin:
Allows moisture out and irritants in

Water loss

Irritants and bacteria

Water loss

Dry or cold air

Higher TEWL value = lower skin integrity[3]

Damaged skin contains fewer ceramides.

💧 = Water droplet illustrates moisture loss from skin.

The Results are Clear: CeraPlus™ Skin Barrier Helps Ensure Healthy Skin From Day One

At Hollister Ostomy Care, we believe peristomal skin deserves better. Clinical evidence continue to empower everything we do.

The ADVOCATE clinical trial looked at the difference in ostomy skin barriers and their impact on costs of stoma care and occurrence of peristomal skin complications (PSCs).

- 14% relative reduction in stoma-related cost of care with the CeraPlus™ Skin Barrier

See the Evidence That Can Empower You.

CeraPlus™ Skin Barriers help support healthy skin and help minimize ostomy burden right from the start.[1]

CeraPlus™ Skin Barriers significantly reduce the stoma-related cost of care.[1]

Significantly more participants were "very satisfied" with overall barrier performance and itching prevention.[1]

15% fewer PSCs with the CeraPlus™ Skin Barrier.

Two-Piece
Pouching System

Why choose a two-piece pouching system?

With a two-piece pouching system, the skin barrier and pouch are separate and connect together with a plastic ring, or flange. Here are a few reasons why you might want to use a two-piece pouching system for your patient:

- May want to change the pouch more often than the skin barrier

- May want to alternate between different pouch styles. For example, a smaller pouch may be worn during exercise or in the shower, and a larger pouch at night

- May find it easier to center the skin barrier over the stoma using a two-piece system

Integrated Floating Flange

- Audible clicks signal a secure attachment
- Discreet low profile attachment of pouch to barrier

CeraPlus™ Skin Barrier

CeraPlus™ Skin Barrier* is infused with ceramide, the skin's naturally occurring protection against dryness. It is designed to maintain adhesive properties, and features a ceramide-infused formulation to help:

- Protect the skin's natural moisture barrier
- Maintain good peristomal skin health
- Decrease transepidermal water loss (TEWL) from damaged or eroded skin

CeraPlus Skin Barriers contain the Remois technology of Alcare Co., Ltd.

Two-Piece Pouches

- Waterproof, integrated AF300™ filter is designed to allow gas and air to escape, but keeps odor and output in the pouch. Liquid cannot penetrate the filter, therefore not requiring a protective sticker
- Choice of secure pouch closure options – clamp or integrated closure
- Numerous pouch size options to meet individual preferences

For corresponding pouches, please see pages 18-20.

One-Piece
Pouching System

Why choose a one-piece pouching system?

With a one-piece pouching system, the skin barrier and pouch are connected and cannot be separated. Here are a few reasons why you might want to use a one-piece pouching system:

- Need a pouching system that is flexible

- May prefer a pouching system that does not require putting pieces together

- Do not wish to change the pouch more often than the skin barrier

Product Features Key
reference for products listed on pages 38-42

UCLR: Ultra-Clear

BGVO: Beige with viewing option

BG: Beige

LNR: Drainable pouch with *Lock 'N Roll*™ (integrated) Closure

CLAMP: Drainable pouch with clamp closure

URO: Urostomy pouching system

CLOSED: Closed pouching system

Flextend™ Soft Convex Skin Barriers

SOFT CONVEX   **Box of 5**

All One-Piece Soft Convex Pouching Systems include Belt Tabs
(CUT-TO-FIT)
▸ Adhesive Border (with tape)
▸ With Integrated *AF300™* Filter*

A Flexible Fit Made Secure

CeraPlus™ Soft Convex Pouching System

Designed to stay secure, no matter what shape the body takes.

When it comes to finding the right solution for patients, fit comes first. Comfort and ease-of-use are also essential to help ensure positive outcomes—in the hospital and after patients leave your care.

CeraPlus™ Soft Convex Skin Pouching System delivers both convex support and flexibility. The skin barrier is designed to conform to the body, without compromising fit. Belt tabs and a tape-bordered barrier help provide an extra sense of security.

- Look for the soft convex symbol   SOFT CONVEX

Accessories

Why use an ostomy accessory?

Ostomy accessories are used together with a pouching system. You may use one or more of these products. Here are a few reasons to use an ostomy accessory:

- It may help enhance the performance of a pouching system. For example, an accessory could help increase wear time, protect the skin, or make the removal of the adhesive easier

- It may help solve a problem such as leakage or skin irritation

- It may help improve the quality of life by eliminating odor

- Designed to meet the unique needs of your patient's body – while providing skin health, added security and confidence they deserve.

Count on the Right Fit With CeraRing™ Barrier Rings

Hollister understands that no two people or stomas are alike — and that barrier rings can play a critical role in helping ensure the best outcome for your patients.

Whether you choose flat or convex, slim or regular, round or oval—CeraRing™ barrier rings:

- Are designed to be stretched or shaped or cut into pieces to use as a filler in uneven areas

- Help prevent stoma output from getting under the pouch seal, which may reduce leakage and skin irritation

- Can be cut or stacked together to improve the fit of the pouching system

- Are alcohol free, so there is no sting from alcohol when applied to broken or irritated skin

Talk to your Hollister ostomy representative about the full line of CeraRing™ barrier rings with ceramide.

Three strips create a custom frame around your skin barrier.

A Sense of Security Means Everything

CeraPlus™ Barrier Extenders

At Hollister™ Ostomy Care, we know a sense of security and leakage prevention are top priorities for you.

Our CeraPlus™ barrier extenders offer an additional layer of protection for those concerned about lifting around the edges of their skin barrier. With a thin and flexible hydrocolloid formulation, CeraPlus™ barrier extenders conform easily to body contours. Three convenient strips make it easy to create a custom frame around the skin barrier. The end result is enhanced sense of security, when it matters most.

Notes

Education

Ostomy Clinical Education

Knowledge is power. When you have access to the latest research, educational materials, product evidence, and training you can do your best work. And that gives your patients the best chance for a successful ostomy journey.

Continued Learning

Ostomy care is constantly changing and evolving, requiring you to be a student throughout your career. We are committed to helping you stay current. Here, you can access webinars, online courses, case studies, and other tools that can help you acquire knowledge and learn new skills – at your own pace.
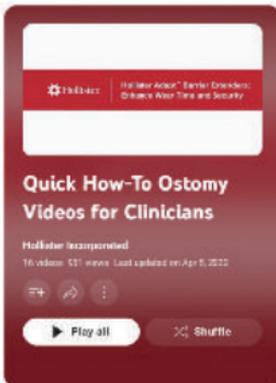

Quick How-To Ostomy Videos for Clinicians

Provides brief instructions for use of specific products and/or instructional information related to specific ostomy products or procedures.

Quick Educational Tools

Access helpful videos, guides, and care tips to learn more about what to expect with ostomy surgery, how to use ostomy products, maintain healthy skin around the stoma, and resume lifestyle activities with an ostomy.

Ostomy Care Tips

These ostomy care tips are designed to assist with ostomy care education. Topics include general ostomy care, product and accessories instructions, maintaining healthy peristomal skin, insurance information, and more.

International Resources

We have translated our educational resources into a variety of languages. These materials can help your patients around the world understand their type of ostomy and how they can live their lives to the fullest.

Product Selector Guide

By answering seven simple questions, let us help you find the CeraPlus™ Ostomy Product* you need. Once completed, you will be offered a free sample and further support from our Hollister Team.
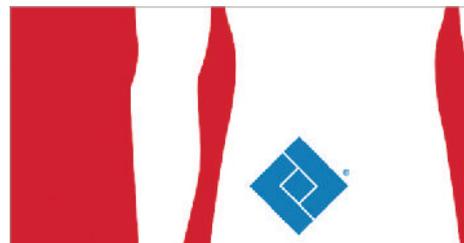

Peristomal Skin Assessment Guide

The Peristomal Skin Assessment Guide helps with assessment and management of common peristomal skin complications and is available on the WOCN Society website.
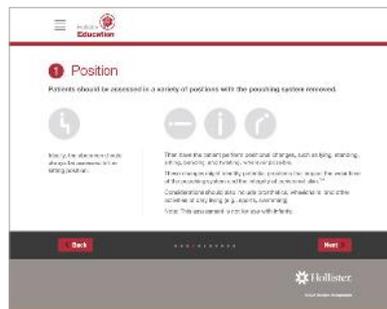

Fit Indicator Tool (FIT)

Fit Indicator Tool (FIT) has been designed to help provide a simple patient assessment methodology to determine the need for a flat or convex barrier.

HCPCS Codes Disclaimer

The reimbursement information provided herein is intended to provide general information concerning coding of Hollister products only. Hollister does not guarantee coverage or payment for any products. The ultimate responsibility for proper coding, satisfying reimbursement requirements, and obtaining reimbursement remains with the provider. Coding and coverage policies and guidelines are complex, can vary from one carrier or region to another, and are updated frequently. Providers should check with their local carriers or intermediaries often and should consult with counsel, a reimbursement specialist, and/or the DMECS website for any coding, coverage, reimbursement, or billing questions.

HCPCS codes shown in this Product Catalog are current as of January 2024.

General Medicare Product Maximum Allowables of Selected Ostomy Products

Two-Piece Pouching Systems	Maximum Quantity per Month
Flat, Standard Wear Skin Barriers with Floating Flanges	20
Drainable Pouches	20
Closed Pouches	60
Urostomy Pouches	20
Irrigator Sleeves	4

One-Piece Pouching Systems	Maximum Quantity per Month
Drainable Pouches with Flat, Standard Wear Skin Barriers	20
Closed Pouches with Flat, Standard Wear Skin Barriers	60
Stoma Caps	31

Pediatric Pouching Systems	Maximum Quantity per Month
One-Piece Drainable and Urostomy Pouches	20
Two-Piece Skin Barriers	20
Two-Piece Drainable and Urostomy Pouches	20
Two-Piece Mini Closed Pouches	60
Pediatric Ostomy Belt	1

Accessories	Maximum Quantity per Month
Skin Barrier Rings	*
Skin Barrier Paste	4 oz
Stoma Powder	10 oz/6 months
Lubricating Deodorant	*
Ostomy Belt	1
Skin Protective Wipes	150/6 months

Note: *Medicare allows a usual maximum quantity of supplies each month. The table above provides the maximum allowable amounts. The amount of supplies you need may vary from the maximum quantities. That will be determined by your physician and must be on your order and in your medical record. If you require more ostomy supplies than what is listed in the table, your physician will need to provide a medical justification for the additional supplies. The ostomy supplier will need to have that medical justification on file when billing the Medicare program for the additional supplies.*

* No usual maximum amount established.

Reimbursement For Fistula Management by Medicare

Reimbursement for fistula management under the Medicare program is described in the Surgical Dressings Policy Article. Specifically the article states:

"Surgical dressings are covered when either of the following criteria are met:
1. They are required for the treatment of a wound caused by, or treated by, a surgical procedure; **or**
2. They are required after debridement of a wound."

The article goes on to explain:

"Examples of situations in which dressings are noncovered under the Surgical Dressings benefit are:

a. Drainage from a cutaneous fistula which has not been caused by or treated by a surgical procedure"

For information see The Fistula Management Care Tip on www.hollister.com

Latex Statement

All Hollister Ostomy Care products found in this catalog and its packaging does not include natural rubber latex as a component, and our component suppliers do not add natural rubber as part of their production process.

Prior to use, be sure to read the Instructions for Use for information regarding intended use, contraindications, warnings, precautions and instructions.

Medicare's Usual Maximum Quantity for Ostomy Supplies

The quantity of ostomy supplies needed by a patient is determined primarily by the type of ostomy, its location, its construction, and the condition of the skin surface surrounding the stoma. There will be variation according to individual patient need and their needs may vary over time. The table below lists the maximum number of items/units of service that are usually medically necessary. The actual quantity needed for a particular patient may be more or less than the amount listed depending on the factors that affect the frequency of barrier and pouch change. The medical necessity for use of a greater quantity of supplies than the amounts listed must be clearly documented in the patient's medical record, and must be available upon request. If adequate documentation is not provided when requested, the excess quantities will be denied as not medically necessary.

Per Medicare LCD for Ostomy Supplies (L33828), effective 1-1-2024.

HCPCS	Long Description	Maximum Quantity
A4331	Extension drainage tubing, any type, any length, with connector/adapter, for use with urinary leg bag or urostomy pouch, each	*
A4357	Bedside drainage bag, day or night, with or without anti-reflux device, with or without tube, each	2 ea /mo

Supplier Matching

Hollister Secure Start™ services can connect patients with a supplier of their choice based on their insurance plan for the products you recommend. The amount of supplies they need may vary from the maximum allowable quantities, but this is determined by a physician and should be included on the patient's order and medical record. For additional assistance, visit **www.securestartservices.com** or call us at **1.888.808.7456**.

Hollister CeraPlus™

Ostomy Products* have received official dermatological accreditation from the **Skin Health Alliance**

Who is the Skin Health Alliance?

The **Skin Health Alliance** is a leading international skin health organization that works closely with dermatologists, scientists and the skin care industry with a common interest in the promotion of healthy skin. The **Skin Health Alliance** awards professional accreditation and endorsement to companies, services and brands seeking independent dermatological recognition for their product research.

- **Hollister CeraPlus™** Ostomy Products* have received official dermatological accreditation from the **Skin Health Alliance**

- In addition to the current rigorous safety testing our products go through, the SHA accreditation signifies that the **Hollister CeraPlus™** Ostomy Products have been independently verified by a specialist panel

- **Hollister CeraPlus™** Ostomy Products may help prevent skin problems and help keep skin healthy from Day 1

- By choosing **Hollister CeraPlus™** Ostomy Products, people using stoma pouches can have the confidence and pride of knowing their barrier helps protect their skin, empowering them to live their life to the fullest

CeraPlus Skin Barriers contain the
Remois Technology of Alcare Co., Ltd. Remois

The spirit of Hollister remains the same today as it did in 1921.

Our Mission

To make life more rewarding and dignified for the people who use our products and services.

Our Vision

To grow and prosper as an independent, employee-owned company and in the process become better human beings.

Our Heritage

The roots of Hollister Incorporated date back to 1921, when 23-year-old entrepreneur John Dickinson Schneider founded a small printing company in Chicago, which he named JDS Printer Craftsman. From the very beginning, John Schneider's business philosophy was "only first class is good enough," and the company became known for its quality products, quality service, and quality people.
