Making a Difference in the Journey of Life

Ostomy Care Product Catalog

Hollister

Ostomy Care
Healthy skin. Positive outcomes.

Healthy Skin. Positive Outcomes.

This is our quest. Keeping peristomal skin healthy. The way it was meant to be.

Hollister Ostomy Care is dedicated to delivering products that provide an optimum fit to prevent leakage, along with the best skin interface formulations to protect and maintain healthy skin.

We believe every unique person with a stoma deserves a customized solution, and the positive outcomes that can result. Our products and services are designed to do just that.

Thank you for partnering with us on our journey.

Table of Contents

Hollister Secure Start Services
Personalized Patient Support

Support Throughout the Continuum of Care

We are proud to offer dedicated support for each and every patient we serve along the continuum of care. Hollister Secure Start services provide a lifetime of personalized support for our members.

Our team is focused on helping patients with:

- Finding the right product fit
- Navigating insurance coverage
- Identifying supplier options
- Providing condition specific education
- And more!

To learn more, call us at **1.888.808.7456**.

Why Secure Start Services for Your Patients?

Secure Start services helps patients—regardless of product brand they use—to get back to living life with confidence and security. We understand this is a process that takes time. That's why our no-cost, personalized service is available for the lifetime of their ostomy.

THE RIGHT PRODUCTS—based on your product recommendations, we help patients find the ostomy products that best fit their needs throughout the lifetime of their ostomy.

OSTOMY SMART EDUCATION—easy access to important care information and lifestyle resources that support the goal of maintaining healthy peristomal skin from the start.

SUPPLIER MATCHING—connects patients with a supplier of their choice based on their insurance plan for the products you recommend.

WOC ACCESS—if the need arises, an ostomy nurse is available to assist with product questions.

ENROLLMENT MADE EASY

Obtaining written patient consent to enroll in Secure Start services is an important step. At Hollister, we prioritize patient privacy—giving patients comfort that their information will remain confidential and will be shared only with those they wish to hear from. Having patient consent on file helps us provide proactive ostomy education and product information throughout their journey.

How to Use The Hollister Product Catalog

Hollister has created this simplified catalog to help our customers find what they need in a quick and efficient manner.

If you...
know the stock number (or stock series number)

Go to the **numeric index at the back of the catalog** on pages 98-99 to find the page number where it appears.

If you...
know the product brand or series name

Go to the **Table of Contents** on pages 2-3 to find the page number where it appears or reference the Product Name Index on pages 100-101.

If you...
know the HCPCS code

Go to the **HCPCS Code Index** at the back of the catalog on page 108.

Fit and Formulation

Promoting healthy peristomal skin

It drives everything we do. In order to promote healthy skin, it is important to understand that the *fit* of the pouching system as well as the *formulation* of the skin barrier go hand in hand.

A pouching system will not maintain a good seal without the proper *fit*. Without the correct *formulation*, the skin around the stoma can be at risk for complications.

Our goal is to help keep the skin around your patient's stoma as healthy as the skin on the rest of their body.

FIT is critical to get a good seal around the stoma to prevent leakage

Barrier Examples

Flat Skin Barrier

Flat Skin Barrier with Round or Oval Convex Barrier Ring

Oval barrier ring shown in picture.

Integrated Soft Convex Barrier

Integrated Convex Barrier

Integrated Convex Barrier with Round or Oval Convex Barrier Ring

Round barrier ring shown in picture.

Prior to use, be sure to read the Instructions for Use for information regarding intended use, contraindications, warnings, precautions and instructions.

Possible Clinical Case Scenarios

Flat Skin Barrier
- Flat peristomal plane
- Adequate stoma protrusion
- Centered stoma opening

Flexible Convexity
- Stoma flush with skin
- Uneven peristomal plane
- Off-centered stoma opening

Soft Convexity
- Gentle pressure required to peristomal plane
- Flush stoma
- Peristomal injury

Firm Convexity
- Creases or folds in peristomal plane
- Off-centered stoma opening
- Stoma retracted below skin surface

Firm Convexity with More Depth
- Recessed or flushed stoma
- Uneven abdominal contours
- Off-centered stoma opening

FORMULATION is the customized ingredients responsible for adhesion, erosion resistance and absorption that must be carefully formulated to create an environment where healthy skin can thrive.

Types of Skin Barrier Formulations and Their Performance

The Hollister Ostomy Care portfolio has a multitude of formulation options that are designed to help ensure an optimal skin interface is possible for every patient.

Extended Wear

CeraPlus Skin Barrier

- Contains all skin barrier characteristics (adhesion, absorption and erosion resistance) and is infused with ceramide – a naturally occurring lipid in the skin which protects against dryness
- Its formulation is designed to help protect the skin's natural moisture barrier and help maintain good peristomal skin health

Flextend Skin Barrier

- Durable with high resistance to erosion
- Swells when it comes in contact with liquid to help form a seal between the skin and the stoma
- High initial tack and suitable for those who perspire heavily
- Strong adhesion and flexibility

FormaFlex Skin Barrier

- Helps to provide a secure peristomal skin seal as it will maintain its shape after being stretched or shaped
- Provides an easy-to-customize opening due to barrier material
- Easy to shape to individual stomas without the use of scissors

Standard Wear

FlexWear Skin Barrier

- Good balance of durability and gentleness providing moderate adhesion, and can handle frequent or infrequent pouch changes
- Resistant to fluid erosion and tends to hold its shape in the presence of fluids
- Suitable for all skin types, depending on change frequency
- Designed to be worn more than one day

SoftFlex Skin Barrier

- Appropriate choice for:
  - Those who have thin, fragile, or sensitive skin (such as those who have undergone chemo/radiation therapy)
  - People who desire frequent removal
- Designed to limit skin damage as its gentle to the skin, which allows for frequent pouch changes
- Thin and flexible without compromising security

Karaya 5 Skin Barrier

- Well-suited for sensitive skin or in some cases where allergic reactions to synthetic barriers has occurred
- Mildly adhesive – needs a belt to secure pouching system

Combined with the flexible and customizable fit choices we offer in our pouching systems, barrier styles and accessories, you can count on the right combination of fit and formulation for your patients.

Pouch and barrier fit options come in both 1 piece and 2 piece options.
- Flat
- Convex
- Soft Convex

The CeraPlus skin barrier

helps maintain healthy skin

from Day One

Ceramide Products

Transforming the skin health conversation

At Hollister Ostomy Care, we believe peristomal skin deserves better. In fact, we think we should expect the skin around the stoma to be as healthy as the skin on the other side of the abdomen.

That's why we've made the pursuit of healthy skin our priority.

The CeraPlus skin barrier is formulated to support healthy skin from Day One. The ceramide-infused barrier is designed to help protect the skin's natural moisture barrier. Healthy skin can remain healthy through pouching changes, and support an appropriate fit around the stoma.

Maintaining the Right Environment

Makes all the Difference

Available on **Premier** One-Piece and **New Image** Two-Piece Pouching Systems

The **CeraPlus** Skin Barrier with Remois Technology*

At Hollister, we realize the importance of healthy peristomal skin. Our newest skin barrier is infused with ceramide, the skin's naturally occurring protection against dryness. The CeraPlus skin barrier is designed to help protect the skin's own moisture barrier, and is available on Premier one-piece and New Image two-piece pouching systems. This means you can enjoy the same pouch and skin barrier features from Hollister that you've come to rely on—and more!

The CeraPlus skin barrier from Hollister Ostomy Care—because peristomal skin deserves better.

Remois

Hollister®

Ostomy Care
Healthy skin. Positive outcomes.

The CeraPlus Skin Barrier delivers both Fit and Formulation

Ceramide-Infused Barrier

- Protects the skin's natural moisture barrier
- Decreases TEWL (transepidermal water loss) from damaged or eroded skin
- Maintains peristomal skin health

Color Matching System

Two-Piece Pouching Systems

To help you select compatible *New Image* pouching system components, every box label is color-coded.

1. Select the skin barrier flange size with the appropriate barrier stoma opening and note its color code.
2. Select a suitable pouch with the desired features in the matching color.

Flange Sizes:

1-3/4" (44 mm)

2-1/4" (57 mm)

2-3/4" (70 mm)

4" (102 mm)
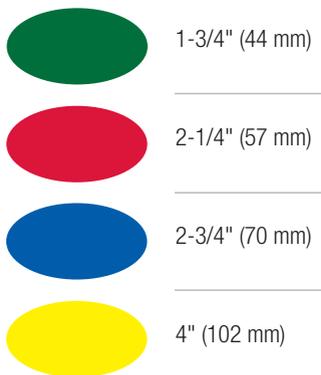

NOTE: All stock numbers shaded in gray throughout this catalog denote ceramide-infused products.

Look for the convex and soft convex symbols:

Infused with the Science
of Skin Health

Adapt CeraRing Barrier Ring

Sealed with the confidence of ceramide

Adapt barrier ring technology was introduced more than 10 years ago. Its ability to be stretched and shaped to help minimize the risk of leakage and protect the peristomal skin makes it a favorite among WOC nurses.

Now, innovation has reached the next level, with the introduction of Adapt CeraRing.

Infused with ceramide—a natural component of the skin—Adapt CeraRing is designed to support the healthy peristomal skin your patients deserve. Ceramides help protect the skin's natural moisture barrier and help prevent water loss that may lead to damage and dryness.

Experience the confidence of ceramide—try Adapt CeraRing today.

Hollister®

Ostomy Care
Healthy skin. Positive outcomes.

For a complete list of Hollister products, refer to the comprehensive Hollister product catalog online at www.hollister.com.

Follow the evidence to help ensure healthy skin

After surgery: Peristomal skin starts healthy

⊕

Top layers of the epidermis are removed with *every barrier change*.
It's unavoidable, and the damage isn't always visible.

⊕

Epidermal stripping is linked to increased levels of transepidermal water loss (TEWL)[1,2]

Healthy Skin:
Keeps moisture in and irritants out

Irritants and bacteria

Dry or cold air

Water retained
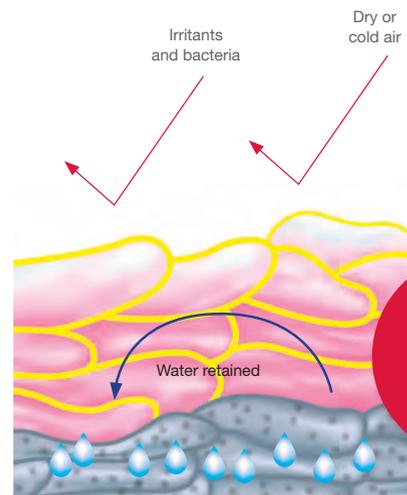

Low TEWL value = higher skin integrity[3]

Ceramides are abundant in healthy skin. They form a waterproof barrier to help keep moisture in and bacteria out.

▬ = Ceramides

Damaged Skin:
Allows moisture out and irritants in

Water loss

Irritants and bacteria

Water loss

Dry or cold air
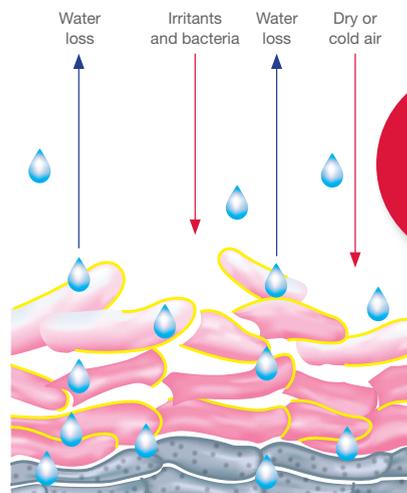

Higher TEWL value = lower skin integrity[3]

Damaged skin contains fewer ceramides.

💧 = Water droplet illustrates moisture loss from skin.

The Results are Clear: CeraPlus Skin Barrier Helps Ensure Healthy Skin From Day One

At Hollister Ostomy Care, we believe peristomal skin deserves better. Clinical evidence continue to empower everything we do.

The ADVOCATE clinical trial looked at difference in ostomy skin barriers and their impact on costs of stoma care and occurrence of peristomal skin complications (PSCs).

- 14% relative reduction in stoma-related cost of care with the CeraPlus skin barrier

See the Evidence That Can Empower You.

CeraPlus skin barriers help support healthy skin and help minimize ostomy burden right from the start.[1]

CeraPlus skin barriers significantly reduce the stoma-related cost of care.[1]

Significantly more participants were "very satisfied" with overall barrier performance and itching prevention.[1]

15% fewer PSCs with the CeraPlus Skin Barrier.

Keeping peristomal skin

healthy is the inspiration

for all we do

New Image
Two-Piece Pouching System

Why choose a two-piece pouching system?

With a two-piece pouching system, the skin barrier and pouch are separate and connect together with a plastic ring, or flange. Here are a few reasons why you might want to use a two-piece pouching system:

- You may want to change your pouch more often than your skin barrier

- You may want to alternate between different pouch styles. For example, you might want to wear a smaller pouch during exercise or in the shower, and a larger pouch at night

- You may find it easier to center your skin barrier over your stoma using a two-piece system

Integrated Floating Flange

- Audible clicks signal a secure attachment
- Discreet low profile attachment of pouch to barrier

CeraPlus Skin Barrier

The CeraPlus skin barrier with Remois technology* is infused with ceramide, the skin's naturally occurring protection against dryness. It is designed to maintain adhesive properties, and features a ceramide-infused formulation to help:

- Protect the skin's natural moisture barrier
- Maintain good peristomal skin health
- Decrease transepidermal water loss (TEWL) from damaged or eroded skin

Remois technology is a technology of Alcare Co., Ltd.

New Image Pouches

- Waterproof, integrated AF300 filter is designed to allow gas and air to escape, but keeps odor and output in the pouch. Liquid cannot penetrate the filter, therefore not requiring a protective sticker
- Choice of secure pouch closure options – clamp or integrated closure
- ComfortWear panels provide enhanced discretion and comfort
- Numerous pouch size options to meet individual preferences

Color Matching System

Two-Piece Pouching Systems

To help you select compatible New Image pouching system components, every box label is color-coded.

1. Select the skin barrier flange size with the appropriate barrier stoma opening and note its color code.

2. Select a suitable pouch with the desired features in the matching color.

Flange Sizes:

1-3/4" (44 mm)

2-1/4" (57 mm)

2-3/4" (70 mm)

4" (102 mm)

NOTE: All stock numbers shaded in gray throughout this catalog denote ceramide-infused products.

Look for the convex and soft convex symbols:

A True Original

The Hollister integrated floating flange—as featured in the *New Image* two-piece pouching system—offers optimal flexibility and security for you and your patients. The first of its kind, this integrated floating flange helps relieve pressure on the tender postoperative or soft abdomen while offering an easy-to-use, low-profile solution patients can continue to use after they transition home. Included in all flat and convex New Image skin barriers.

A combination of the right

fit and formulation is the key

to positive outcomes
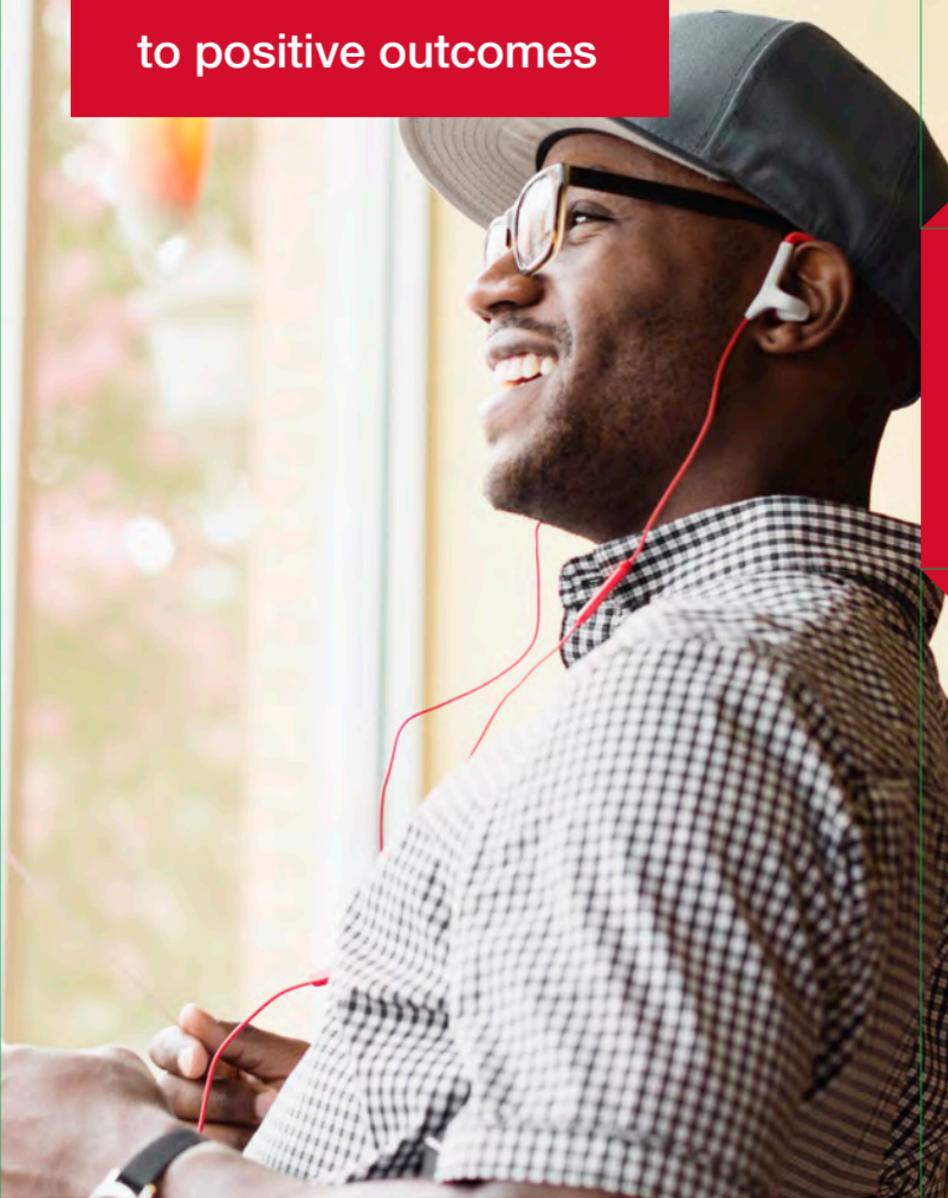

Premier
One-Piece Pouching System

Why choose a one-piece pouching system?

With a one-piece pouching system, the skin barrier and pouch are connected and cannot be separated. Here are a few reasons why you might want to use a one-piece pouching system:

- You need a pouching system that is flexible

- You may prefer a pouching system that does not require putting pieces together

- You do not wish to change your pouch more often than your skin barrier

Upgraded Product Design

Select *Premier* One-Piece Pouching Systems feature two important product upgrades:

- ***Lock 'n Roll*** Microseal Closure with ribbed strips to facilitate ease of use, and transparent flap for increased security

- Upgraded **skin barrier design** to help increase comfort and help improve ease of use:
  - Flexible release liner covers both the skin barrier and the tape border to help provide improved ease of use
  - Tapered barrier edges to help provide increased comfort
  - No change in skin barrier application
  - Same HCPCS code

Look for the UPGRADED DESIGN **header above these stock numbers.**

For more information, contact your Hollister Ostomy sales representative.

A flexible fit

made secure

Premier Soft Convex Pouching System

Designed to stay secure, no matter what shape the body takes.

When it comes to finding the right solution for patients, fit comes first. Comfort and ease-of-use are also essential to help ensure positive outcomes—in the hospital and after patients leave your care.

Hollister Ostomy presents Premier soft convex—a pouching system that delivers both convex support and flexibility. The skin barrier is designed to conform to the body, without compromising fit. Belt tabs and a tape-bordered barrier help provide an extra sense of security. And the new viewing option offers a convenient way to help position the pouch and observe output.

- Look for the soft convex symbol   SOFT CONVEX

- Available in CeraPlus and Flextend (extended wear) skin barrier formulations

Hollister

Ostomy Care
Healthy skin. Positive outcomes.

?   DID YOU KNOW…

Select **Premier** one-piece pouching systems feature two important product upgrades:

• *Lock 'n Roll* Microseal Closure with ribbed strips to facilitate ease of use, and transparent flap for increased security

• Upgraded **skin barrier design** to help increase comfort and help improve ease of use:

  - Flexible release liner covers both the skin barrier and the tape border to help provide improved ease of use

  - Tapered barrier edges to help provide increased comfort

  - No change in skin barrier application

  - Same HCPCS code

?   DID YOU KNOW…

- *Premier* cut-to-fit products have a 1/2" (13 mm) starter hole and can be used as a pre-sized product for some small stomas (excludes high output pouches, wound drainage collectors and *Pouchkins* products)
- Cutting guides are provided for all cut-to-fit barriers
- Drainable pouches without an integrated closure include one pouch clamp per box
- We do not recommend protective wipes be used with extended wear skin barriers, as they may decrease wear time
- Filtered pouches do not require a cover or sticker when the pouch may get wet
- All convex *Premier* pouches have tape border barriers
- All convex *Premier* pouches have belt tabs

The upgraded Hollister urostomy pouch is available in the _Premier_ one-piece pouching system.

The upgraded pouch features several innovations designed to deliver more comfort and a greater sense of control:

- Skin barrier options to create custom solutions for your patients' unique needs

    - Flat, convex or soft convex
    - Tape border
    - *Flextend* (extended wear) skin barrier
    - *CeraPlus* (extended wear) skin barrier

- Enhanced flow-control tap is made with soft material and a streamlined tap

- Multi-chamber design helps to facilitate even distribution of urine

- Improved adapter helps facilitate ease of use

- Belt tab option (convex)

Shadow Buddies dolls

• Exclusive to **Hollister**, *Shadow Buddies* dolls are special friends for children who have had or will have ostomy surgery
• Great teaching tool to help with education and care giving
• Huggable dolls with heart-shaped eyes and a stoma provide comfort and support

To order, see page 93.

Shadow Buddies is a trademark of The Shadow Buddies Foundation

Accessories can enhance

performance of the skin barrier

and promote healthy skin

Accessories

Accessories

Why use an ostomy accessory?

Ostomy accessories are used together with your pouching system. You may use one or more of these products. Here are a few reasons why you might want to use an ostomy accessory:

- It may help enhance the performance of your pouching system. For example, an accessory could help increase wear time, protect your skin, or make the removal of your adhesive easier

- It may help solve a problem such as leakage or skin irritation

- It may help improve the quality of your life by eliminating odor

Count on the Right Fit With

Adapt Barrier Rings

Hollister understands that no two people or stomas are alike — and that barrier rings can play a critical role in helping ensure the best outcome for your patients

Whether you choose flat or convex, slim or regular, round or oval— Adapt barrier rings:

- Are designed to be stretched or shaped or cut into pieces to use as a filler in uneven areas

- Help prevent stoma output from getting under the pouch seal, which may reduce leakage and skin irritation

- Can be cut or stacked together to improve the fit of the pouching system

- Are alcohol free, so there is no sting from alcohol when applied to broken or irritated skin

Talk to your Hollister ostomy representative about the full line of Adapt barrier rings, now available with and without ceramide.

Hollister

Ostomy Care
Healthy skin. Positive outcomes.

A Sense of Security

Means Everything

Adapt Barrier Extenders

Three strips create a custom frame around your skin barrier.

At Hollister Ostomy Care, we know a sense of security and leakage prevention are top priorities for you.

Our Adapt barrier extenders offer an additional layer of protection for those concerned about lifting around the edges of their skin barrier. With a thin and flexible hydrocolloid formulation, Adapt barrier extenders conform easily to body contours. Three convenient strips make it easy to create a custom frame around the skin barrier. The end result is enhanced security, when it matters most.

 Hollister

Ostomy Care
Healthy skin. Positive outcomes.

Fit Indicator Tool (FIT)
Fit Indicator Tool (FIT) has been designed to help provide a simple patient assessment methodology to determine the need for a flat or convex barrier. Open the app Store or Google Play and search using: "Hollister Education".

Peristomal Skin Assessment Guide
The Peristomal Skin Assessment Guide helps with assessment and management of common peristomal skin complications and is available at the WOCN Society website. Also available for consumer use. psag.wocn.org

Online Education Program
Our Ostomy Care course allows healthcare professionals to learn about different types of ostomies, problem-solving tips, and additional resources. It also provides flexibility and the ease of online, anytime e-learning. www.hollister.com/ostomyelearning

AF300 Filter: "AF" stands for air flow and "300" represents the 300 mm² air flow surface area on every *AF300* filter.

Ceramide: A natural component of the human skin that links the cells of the stratum corneum together to form a waterproof protective barrier. This helps prevent water loss that can lead to skin damage and dryness.

CeraPlus Skin Barrier: A skin barrier that has all the basic characteristics of an ostomy skin barrier (adhesion, absorption, and erosion resistance) and is infused with ceramide. *CeraPlus* is an example of an extended wear skin barrier.

Closed Pouch: A pouch without an opening at the bottom. Quick and easy to discard. It must be removed to be emptied.

Colostomy: An ostomy (surgical opening) created in the colon, part of the large intestine.

ComfortWear (pouch) Panels: Provide a soft cloth between the pouch film and the skin.

Convex Skin Barrier: A skin barrier shaped to press more deeply around the stoma. May be used when the stoma does not protrude from the abdomen.

Cut-to-Fit Skin Barrier: A skin barrier that can be customized to a needed size and shape. Ideal for stomas that are not round or stomas that are still changing in size.

Drainable Pouch: A pouch with an opening at the bottom. An integrated closure system or plastic clamp is used to keep the pouch closed until it is time to empty it.

Filter: Releases gas but not odor out of the pouch. The key performance factors of any filter are air flow, deodorization, and liquid protection.

Flange: The plastic ring in a two-piece ostomy system that is used to connect the skin barrier and pouch together.

Flat Skin Barrier: May be used when the stoma protrudes from the abdomen.

Flextend Skin Barrier: A skin barrier designed to be durable and resistant to liquid discharge. *Flextend* is an example of an extended wear skin barrier.

FlexWear Skin Barrier: A skin barrier designed to be worn more than one day. A *FlexWear* skin barrier is designed to be more resistant to breakdown than a *SoftFlex* skin barrier. *FlexWear* is an example of a standard wear skin barrier.

Floating Flange: Type of skin barrier flange found on Hollister two-piece pouching systems that allows you to put your fingers under the skin barrier flange while attaching the pouch.

FormaFlex Skin Barrier: A skin barrier that can be stretched to fit the size and shape of the stoma without the use of scissors. It is a barrier option in the New Image two-piece pouching system. *FormaFlex* is an example of an extended wear skin barrier.

Ileostomy: A sugically created opening in the last portion of the small intestine.

Irrigation: A procedure sometimes used by individuals with a colostomy to control bowel elimination. It is not for everyone with a colostomy and requires special equipment and instruction by a knowledgeable healthcare provider.

Lock 'n Roll Microseal Closure: Integrated system for closing the bottom of drainable pouches. Utilizes plastic interlocking fasteners to create a secure closure. Found on *New Image*, *Premier*, and *Pouchkins* drainable pouches.

Medical Adhesive-Related Skin Injury (MARSI): Occurrences in which erythema and/or other manifestation such as blister, tear or other injury persists more than 30 minutes after removal of medical adhesive.

Odor-Barrier Pouch: Is highly resistant to letting odors pass through the pouch film. The odor barrier quality increases confidence when wearing a pouch.

Peristomal Moisure-Associated Skin Damage (PMASD): Inflammation and erosion of the skin adjacent to the stoma, associated with exposure to effluent such as urine or stool.

Pre-Sized Skin Barrier: A skin barrier that is already cut to the proper size.

QuietWear Pouch Material: Material comprised of a pouch film and *ComfortWear* panel that are laminated together. This special design results in the reduction of the pouch rustling noise.

SoftFlex **Skin Barrier:** A skin barrier that provides gentle adhesive attachment to the skin. *SoftFlex* is designed to limit skin damage with frequent removal and can be changed daily (or more often). *SoftFlex* is an example of a standard wear skin barrier.

Stoma: A surgically created opening in the gastrointestinal or urinary tract. Also known as an ostomy. The stoma is pink and moist and doesn't have feeling.

Urostomy: A surgically created opening into the urinary system; drains urine and sometimes mucus.

Urostomy Pouches: Pouch with a drain tap at the bottom so urine can be emptied quickly and easily.

Wear Time: The length of time a product can be worn before failure. Wear time varies widely based upon a variety of factors.

Key Goals for Nursing Management

- **Protect the skin** – The output from a fistula can be very irritating to the skin. Broken skin contributes to pain and discomfort. A skin barrier can protect the skin from contact with the drainage.

- **Contain the output** – If the output is minimal, gauze dressings may be sufficient for containment. However, if the volume of the output from the fistula is significant or frequently overwhelms the dressing, a pouch may be more appropriate. Using a pouch can be more efficient and can protect healthcare providers from exposure to bodily fluids.

- **Measure the output** – With a high output fistula, loss of fluids and electrolytes can be a major concern. Measuring the drainage is easier using a pouching system. Sometimes connecting a pouch to a bedside collector can relieve the stress on the pouch, so the wear time improves.

- **Manage costs** – Care of fistulas can be costly in terms of supplies and human resources. Using a pouching system and appropriate accessories can be more cost-effective and manageable than frequent dressing changes.

- **Control odor** – Containment of the drainage in a pouching system, even in small quantities, can manage odor effectively. Other accessory products can also assist with odor control when the pouch is changed or emptied.

- **Provide patient comfort** – Effectively managing a fistula can contribute to patient dignity. Protecting the skin, collecting the discharge, containing costs, and controlling odor all contribute to patient comfort.

Nix, D & Bryant, R. (2016). *Fistula Management,* Chapter 17 in Carmel, J.E., Colwell, J.C., & Goldberg, M.T. (Eds). Wound Ostomy and Continence Nurses Society Core Curriculum Ostomy Management. Wolters Kluwer, PA.

HCPCS Codes Disclaimer

The reimbursement information provided herein is intended to provide general information concerning coding of Hollister products only. Hollister does not guarantee coverage or payment for any products. The ultimate responsibility for proper coding, satisfying reimbursement requirements, and obtaining reimbursement remains with the provider. Coding and coverage policies and guidelines are complex, can vary from one carrier or region to another, and are updated frequently. Providers should check with their local carriers or intermediaries often and should consult with counsel, a reimbursement specialist, and/or the DMECS website for any coding, coverage, reimbursement, or billing questions.

HCPCS codes shown in this Product Catalog are current as of January 2018.

General Medicare Product Maximum Allowables of Selected Ostomy Products

Two-Piece Pouching Systems	Maximum Quantity per Month
Flat, Standard Wear Skin Barriers with Floating Flanges	20
Drainable Pouches	20
Closed Pouches	60
Urostomy Pouches	20
Irrigator Sleeves	4

One-Piece Pouching Systems	Maximum Quantity per Month
Drainable Pouches with Flat, Standard Wear Skin Barriers	20
Closed Pouches with Flat, Standard Wear Skin Barriers	60
Stoma Caps	31

Pediatric Pouching Systems	Maximum Quantity per Month
One-Piece Drainable and Urostomy Pouches	20
Two-Piece Skin Barriers	20
Two-Piece Drainable and Urostomy Pouches	20
Two-Piece Mini Closed Pouches	60
Pediatric Ostomy Belt	1

Accessories	Maximum Quantity per Month
Skin Barrier Rings	*
Skin Barrier Paste	4 oz
Stoma Powder	10 oz/6 months
Lubricating Deodorant	*
Ostomy Belt	1
Skin Protective Wipes	150/6 months

Note: Medicare allows a usual maximum quantity of supplies each month. The table above provides the maximum allowable amounts. The amount of supplies you need may vary from the maximum quantities. That will be determined by your physician and must be on your order and in your medical record. If you require more ostomy supplies than what is listed in the table, your physician will need to provide a medical justification for the additional supplies. The ostomy supplier will need to have that medical justification on file when billing the Medicare program for the additional supplies.

* No usual maximum amount established.

Reimbursement For Fistula Management by Medicare

Reimbursement for fistula management under the Medicare program is described in the Surgical Dressings Policy Article. Specifically the article states:

"Surgical dressings are covered when either of the following criteria are met:
1. They are required for the treatment of a wound caused by, or treated by, a surgical procedure; **or**
2. They are required after debridement of a wound."

The article goes on to explain:

"Examples of situations in which dressings are noncovered under the Surgical Dressings benefit are:
a. Drainage from a cutaneous fistula which has not been caused by or treated by a surgical procedure"

For information see The Fistula Management Care Tip on www.hollister.com

Latex Statement

All Hollister Ostomy Care products found in this catalog and its packaging does not include natural rubber latex as a component, and our component suppliers do not add natural rubber as part of their production process.

Prior to use, be sure to read the Instructions for Use for information regarding intended use, contraindications, warnings, precautions and instructions.

? DID YOU KNOW…

Supplier Matching

"Having a supplier that can provide your preferred products when you need them is important. If you are having a difficult time finding a supplier who provides your preferred products, please call 888-808-7456 to learn your options."

– Secure Start Member

Hollister Secure Start services can connect patients with a supplier of their choice based on their insurance plan for the products you recommend. The amount of supplies they need may vary from the maximum allowable quantities, but this is determined by a physician and should be included on the patient's order and medical record. For additional assistance, visit **www.securestartservices.com** or call us at **1.888.808.7456**.

Medicare's Usual Maximum Quantity for Ostomy Supplies

The quantity of ostomy supplies needed by a patient is determined primarily by the type of ostomy, its location, its construction, and the condition of the skin surface surrounding the stoma. There will be variation according to individual patient need and their needs may vary over time. The table below lists the maximum number of items/units of service that are usually medically necessary. The actual quantity needed for a particular patient may be more or less than the amount listed depending on the factors that affect the frequency of barrier and pouch change. The medical necessity for use of a greater quantity of supplies than the amounts listed must be clearly documented in the patient's medical record, and must be available upon request. If adequate documentation is not provided when requested, the excess quantities will be denied as not medically necessary.

Per Medicare LCD for Ostomy Supplies (L33828), effective 1-1-2020.

HCPCS	Long Description	Maximum Quantity
A4331	Extension drainage tubing, any type, any length, with connector/adapter, for use with urinary leg bag or urostomy pouch, each	*
A4357	Bedside drainage bag, day or night, with or without anti-reflux device, with or without tube, each	2 ea /mo
A4361	Ostomy faceplate, each	3 ea/6 mo
A4362	Skin barrier, solid, 4 x 4 or equivalent, each	20 ea/mo
A4363	Ostomy clamp, any type, replacement only, each	*
A4364	Adhesive, liquid or equal, any type, per ounce	4 oz/mo
A4366	Ostomy vent, any type, each	*
A4367	Ostomy belt, each	1 ea/mo
A4368	Ostomy filter, any type, each	*
A4369	Ostomy skin barrier, liquid (spray, brush, etc.), per ounce	2 oz/mo
A4371	Ostomy skin barrier, powder, per ounce	10 oz/6 mo
A4372	Ostomy skin barrier, solid 4 x 4 or equivalent, standard wear with built-in convexity, each	*
A4373	Ostomy skin barrier, with flange (solid, flexible, or accordion), with built-in convexity, any size, each	*
A4375	Ostomy pouch, drainable, with faceplate attached, plastic, each	*
A4376	Ostomy pouch, drainable, with faceplate attached, rubber, each	*
A4377	Ostomy pouch drainable for use on faceplate, plastic, each	10 ea/mo
A4378	Ostomy pouch, drainable, for use on faceplate, rubber, each	*
A4379	Ostomy pouch, urinary, with faceplate attached, plastic, each	*
A4380	Ostomy pouch, urinary, with faceplate attached, rubber, each	*
A4381	Ostomy pouch, urinary, for use with faceplate, plastic, each	10 ea/mo
A4382	Ostomy pouch, urinary, for use on faceplate, heavy plastic, each	*
A4383	Ostomy pouch, urinary, for use on faceplate, rubber, each	*
A4384	Ostomy faceplate equivalent, silicone ring, each	*
A4385	Ostomy skin barrier, solid 4 x 4 or equivalent, extended wear, without built-in convexity, each	*
A4387	Ostomy pouch, closed, with barrier attached, with built-in convexity (one-piece), each	*
A4388	Ostomy pouch, drainable, with extended wear barrier attached, (one-piece), each	*
A4389	Ostomy pouch, drainable, with barrier attached, with built-in convexity (one-piece), each	*

No established usual maximum, refer to Medicare Utilization Guidelines.

HCPCS	Long Description	Quantity
A4390	Ostomy pouch, drainable, with extended wear barrier attached, with built-in convexity (one-piece), each	*
A4391	Ostomy pouch, urinary, with extended wear barrier attached (one-piece), each	*
A4392	Ostomy pouch, urinary, with standard wear barrier attached, with built-in convexity (one-piece), each	*
A4393	Ostomy pouch, urinary, with extended wear barrier attached, with built-in convexity (one-piece), each	*
A4394	Ostomy deodorant, with or without lubricant, for use in ostomy pouch, liquid, per fluid ounce	*
A4395	Ostomy deodorant for use in ostomy pouch, solid, per tablet	*
A4396	Ostomy belt with peristomal hernia support	*
A4397	Irrigation supply, sleeve, each	4 ea/mo
A4398	Ostomy irrigation supply, bag, each	2 ea/6 mo
A4399	Ostomy irrigation supply, cone/catheter, with or without brush	2 ea/6 mo
A4402	Lubricant, per ounce	4 oz/mo
A4404	Ostomy ring, each	10 ea/mo
A4405	Ostomy skin barrier, non-pectin based, paste, per ounce	4 oz/mo
A4406	Ostomy skin barrier, pectin-based, paste, per ounce	4 oz/mo
A4407	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, with built-in convexity, 4 x 4 inches or smaller, each	*
A4408	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, with built-in convexity, larger than 4 x 4 inches, each	*
A4409	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, without built-in convexity, 4 x 4 inches or smaller, each	*
A4410	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, without built-in convexity, larger than 4 x 4 inches, each	*
A4411	Ostomy skin barrier, solid 4 x 4 or equivalent, extended wear, with built-in convexity, each	*
A4412	Ostomy pouch, drainable, high output, for use on a barrier with flange (two-piece system), without filter, each	*
A4413	Ostomy pouch, drainable, high output, for use on a barrier with flange (two-piece system), with filter, each	*
A4414	Ostomy skin barrier, with flange (solid, flexible, or accordion), without built-in convexity, 4 x 4 inches or smaller, each	20 ea/mo
A4415	Ostomy skin barrier, with flange (solid, flexible, or accordion), without built-in convexity, larger than 4 x 4 inches, each	20 ea/mo
A4416	Ostomy pouch, closed, with barrier attached, with filter (one-piece), each	60 ea/mo
A4417	Ostomy pouch, closed, with barrier attached, with built-in convexity, with filter (one-piece), each	60 ea/mo
A4418	Ostomy pouch, closed, without barrier attached, with filter (one-piece), each	60 ea/mo
A4419	Ostomy pouch, closed, for use on barrier with non-locking flange, with filter (two-piece), each	60 ea/mo
A4420	Ostomy pouch, closed, for use on barrier with locking flange (two-piece), each	60 ea/mo
A4421	Ostomy supply; miscellaneous	*
A4422	Ostomy absorbent material (sheet/pad/crystal packet) for use in ostomy pouch to thicken liquid stomal output, each	*

No established usual maximum, refer to Medicare Utilization Guidelines.

HCPCS	Long Description	Quantity
A4423	Ostomy pouch, closed, for use on barrier with locking flange, with filter (two-piece), each	60 ea/mo
A4424	Ostomy pouch, drainable, with barrier attached, with filter (one-piece), each	20 ea/mo
A4425	Ostomy pouch, drainable, for use on barrier with non-locking flange, with filter (two-piece system), each	20 ea/mo
A4426	Ostomy pouch, drainable, for use on barrier with locking flange (two-piece system), each	20 ea/mo
A4427	Ostomy pouch, drainable, for use on barrier with locking flange, with filter (two-piece system) each	20 ea/mo
A4428	Ostomy pouch, urinary, with extended wear barrier attached, with faucet-type tap with valve (one-piece), each	*
A4429	Ostomy pouch, urinary, with barrier attached, with built-in convexity, with faucet-type tap with valve (one-piece), each	20 ea/mo
A4430	Ostomy pouch, urinary, with extended wear barrier attached, with built-in convexity, with faucet-type tap with valve (one-piece), each	*
A4431	Ostomy pouch, urinary, with barrier attached, with faucet-type tap, with valve (one-piece), each	20 ea/mo
A4432	Ostomy pouch, urinary, for use on barrier with non-locking flange, with faucet-type tap with valve (two-piece), each	20 ea/mo
A4433	Ostomy pouch, urinary, for use on barrier with locking flange (two-piece), each	20 ea/mo
A4434	Ostomy pouch, urinary, for use on barrier with locking flange, with faucet-type tap with valve (two-piece), each	20 ea/mo
A4435	Ostomy pouch, drainable, high output, with extended wear barrier (one-piece system), with or without filter, each	*
A4450	Tape, non-waterproof, per 18 square inches	40 ea (18 sq in)/mo
A4452	Tape, waterproof, per 18 square inches	40 ea (18 sq in)/mo
A4455	Adhesive remover or solvent (for tape, cement, or other adhesive), per ounce	16 oz/6 mo
A4456	Adhesive remover, wipes, any type, each	*
A5051	Ostomy pouch, closed, with barrier attached (one-piece), each	60 ea/mo
A5052	Ostomy pouch, closed, without barrier attached, (one-piece), each	60 ea/mo
A5053	Ostomy pouch, closed, for use on faceplate, each	60 ea/mo
A5054	Ostomy pouch, closed, for use on barrier with flange (two-piece), each	60 ea/mo
A5055	Stoma Cap	31 ea/mo
A5056	Ostomy pouch, drainable, with extended wear barrier attached, with filter, (one-piece), each	40 ea/mo
A5057	Ostomy pouch, drainable, with extended wear barrier attached, with built-in convexity, with filter, (one-piece), each	40 ea/mo
A5061	Ostomy pouch, drainable, with barrier attached (one-piece), each	20 ea/mo
A5062	Ostomy pouch, drainable, without barrier attached (one-piece), each	20 ea/mo
A5063	Ostomy pouch, drainable, for use on barrier with flange (two-piece system), each	20 ea/mo
A5071	Ostomy pouch, urinary, with barrier attached (one-piece), each	20 ea/mo
A5072	Ostomy pouch, urinary, without barrier attached (one-piece), each	20 ea/mo
A5073	Ostomy pouch, urinary, for use on barrier with flange (two-piece), each	20 ea/mo

No established usual maximum, refer to Medicare Utilization Guidelines.

HCPCS	Long Description	Quantity
A5081	Continent device, plug for continent stoma	31 ea/mo
A5082	Continent device, catheter for continent stoma	1 ea/mo
A5083	Continent device, stoma absorptive cover for continent stoma	150 ea/mo
A5093	Ostomy accessory, convex insert	10 ea/mo
A5102	Bedside drainage bottle with or without tubing, rigid or expandable, each	2 ea/6 mo
A5120	Skin barrier, wipes or swabs, each	150 ea/6 mo
A5121	Skin barrier, solid, 6 x 6 or equivalent, each	20 ea/mo
A5122	Skin barrier, solid, 8 x 8 or equivalent, each	20 ea/mo
A5126	Adhesive or non-adhesive, disk or foam pad	20 ea/mo
A5131	Appliance cleaner, incontinence and ostomy appliances, per 16 ounce	1 ea (16 oz btl)/mo
A9270	Non-covered item or service	*

No established usual maximum, refer to Medicare Utilization Guidelines.

Index • HCPCS Codes

The spirit of Hollister remains the same today as it did in 1921.

Our Mission

To make life more rewarding and dignified for the people who use our products and services.

Our Vision

To grow and prosper as an independent, employee-owned company and in the process become better human beings.

Our Heritage

The roots of Hollister Incorporated date back to 1921, when 23-year-old entrepreneur John Dickinson Schneider founded a small printing company in Chicago, which he named JDS Printer Craftsman. From the very beginning, John Schneider's business philosophy was "only first class is good enough," and the company became known for its quality products, quality service, and quality people.
